PROFILE

A final-year student of Computer Science Engineering (AI) with strong skills in Python, Flask, and Machine learning. Focusing on developing ethical and business-oriented AI solutions while working in model deployment, data analysis, MongoDB/MySQL, and Explainable AI systems (Grad-CAM).

EDUCATION

Maharaja Institute of Technology Mysore, 2022 – 2026 | Mysuru, India
B.E in Artificial Intelligence (pursing)
CGPA-8.23(6th Sem)

SKILLS

Programming Languages:

C, C++, Python

Web Development:

HTML, CSS, JavaScript

AI/ML:

PyTorch, OpenCV, Flask, Pandas, NumPy

Database Management:

MongoDB, MySQL

Data Analytics:

Tableau, PowerBI

Version Control:

Git, Github

PROJECTS

Oil Spill Detection Using Deep Learning

- Developed an oil spill detection system using image processing and machine learning techniques to analyze satellite imagery.
- Preprocessed image datasets, applied feature extraction, and trained a classification model to identify oil spills.
- Implemented the system in Python with OpenCV and deep learning libraries to automate detection for environmental monitoring.

Brain Tumor Detection

- Developed a deep learning-based web application to classify brain tumors into four categories (glioma, meningioma, pituitary, no tumor).
- Trained a PyTorch model (ResNet18), Integrated Grad-CAM for model explainability, and TTA (Test- Time Augmentation) for robust predictions.
- Deployed as a Flask app with a user-friendly interface for MRI image upload and diagnosis visualization.

COURSES

DevOps, DataOps, MLOps, Duke University  2025

ACHIEVEMENTS

HAXLR8, MIT Mysore

Participated in a competitive hackathon, enhancing problem-solving, innovation, and teamwork through project development.
